Help Information

Overall Keyword Conversion

Which keywords drive the highest quality traffic? This report shows number of visits, pageviews per visit, conversion rates, and average value per visit for paid and organic keywords.

Click the plus next to any keyword to drill down and compare search engines and paid versus organic within a keyword.

Click the  button at the far left of any entry to view the data over time, to view to-date lifetime value, or to cross-segment this data.

To compare two date ranges, click the  on the Date Range title bar.

Visits is the number of visits referred by each keyword. P/visit is pageviews divided by number of visits. G/visit is number of goal conversions divided by number of visits. T/visits is number of e-commerce transactions divided by number of visits. \$/visit is revenue (from e-commerce) or goal value divided by number of visits.
