Keyword Considerations

How well do other keywords perform? This report shows the top performing unused organic keywords. Each keyword's performance is shown in terms of number of visits, pageviews per visit, conversion rates, transactions per visit, and average visit value.

Click the  button at the far left of any entry to view the data over time, to view to-date lifetime value, or to cross-segment this data.

Visits is the number of visits referred by the keyword from organic search. P/Visit is pageviews divided by number of visits, G/Visit is number of goal conversions divided by number of visits. T/Visits is number of e-commerce transactions divided by number of visits. \$/Visit is revenue (from e-commerce) or goal value divided by number of visits.
